

On January 12, a Town of Poughkeepsie bank account was compromised and unauthorized transactions took place. We immediately initiated a criminal investigation involving the Town of Poughkeepsie Police and the Secret Service. We are working closely with the police, Secret Service, and the bank security department to resolve the situation. We have taken all measures possible to ensure the safety and security of all Town accounts.

While I would like to release more information at this time, at the request of the Town Police and the Secret Service no further details can be made public at this time.

I assure you, that as soon as releasing details will not hinder the investigation I will provide everyone with a complete accounting of what took place.
